# Do you carry waste?

## Do you carry scrap metal?

If you carry waste or scrap metal as part of your business you may need to register as a Waste Carrier with Natural Resources Wales. There is a two-tier system for registration based on the level of risk.

Natural Resources Wales website will help you decide whether you need to be registered, and if so, which level of registration is right for you [naturalresourceswales.gov.uk](http://naturalresourceswales.gov.uk) and search 'waste carrier'. You can register on line or contact Natural Resources Wales for further information on 0300 065 3000.

Carrying waste without being a registered Waste Carrier could lead to prosecution and a maximum fine of £5,000

### Scrap Metal Dealers Act 2013

Anyone who collects scrap metal must also have a collectors licence with their Local Authority and have a copy on display in their vehicle. This allows you to operate as a collector in the area of the issuing Local Authority. A separate licence has to be obtained from each Local Authority you wish to operate in. It is a criminal offence not to be registered if needed.

To find out more information on the application and fee, you must contact your Local Authority.

### Complete waste documentation

As well as registering as a waste carrier, you will also need to make sure you complete a waste document like a transfer note either hard copy or via the Electronic Duty of Care (EDoC) system, for every load of waste you pass to others. Waste documentation should be kept for at least 2 years.

You must only take waste to a licensed site. These sites require that you are a registered Waste Carrier and have the appropriate waste documentation.

**THE MAXIMUM PENALTIES FOR FLY-TIPPING ARE A £50,000 FINE AND UP TO 5 YEARS IN PRISON**
